## PROGRAM FOR CHAUTAUQUA

The Swarthmore Chautauqua which is to be held in Odeon Hall, Bethel, Dec. 1-3, has arranged of the very best programs ever put before the public. An idea of what the public thinks of this year's program may be gleaned from the fact that out of 40 towns played to by them, 30 have signed contracts for another year. Nearly 100% of satisfied patrons.

The ticket committee is functioning and all are urged to buy tickets early. No season tickets are sold after the opening of Chautauqua. The price for season tickets is \$2.00 for adults and \$1.00 for children.

The program is as follows:  
Opening Day  
Afternoon—Opening Exercises—Committee in Charge  
Concert—Artists Dickson Company  
Junior Chautauqua Activities  
Night—Concert—Artists Dickson Co.  
Lecture—"The Modern Tale of Two Cities"

Charles Howard Plattenburg  
Second Day  
Afternoon—Entertainment—"The Old Country Fiddler"  
Charles Ross Taggart  
Junior Chautauqua Activities  
Night—Comedy Drama—"Applesauce"

Closing Day  
Afternoon—Junior Chautauqua Pageant  
Popular Lecture—Chautauqua Super-Intendant  
Night—Concert—The Lowell Patton Artists

The Artists Dickson Concert Company, consisting of Artists Dickson, harp, Martha Dickson, pianist, and Helen Hunt, violinist, is announced for two concerts on the opening day of the three day indoor Chautauqua soon to be held here. The dates have been fixed as Dec. 1-3.

On the first afternoon, after the opening exercises, the Dickson Company will give a varied program consisting of arias, ballads, piano solos, violin solos, piano, Negro spirituals, vocal solos (with violin obligato), Scotch songs in costume, character readings, and sketches.

On the opening night of the coming Chautauqua Festival to be held for three days, Dec. 1-3, in Odeon Hall, Charles Howard Plattenburg, a lecturer who has appeared in every state in the Union save two in the past ten years, will give his address "The Modern Tale of Two Cities" which is reported to be full of valuable information on elvish improvement and inspiration for its accomplishment.

Mr. Plattenburg, before he gave all his time to the lecture platform, was a highly successful Iowa newspaper editor. The information he has and the suggestions he makes are the result of years of practical experience in solving the community problems he talks about.

The "fiddling flosser" is the title often given to Charles Ross Taggart, the well known entertainer who gives the second afternoon program of the Chautauqua Festival, opening here on Dec. 1. His philosophy while he fiddles and his homely wisdom is well worth hearing according to all reports.

The play to be given at this year's Chautauqua Festival of three days beginning Dec. 1 has been announced as "Applesauce" by Harry Connors. This is the same play that ran for several months in each of the metropolitan centers, New York, Philadelphia, Chicago, and Boston. It will be presented here by a competent cast and with special scenery.

This lively comedy drama is to be a full evening's attraction at Chautauqua. According to the reports there are over 130 laughs in 115 minutes of actual playing time, and the advance notice calls for a check up on the number of "A's" and "O's" that will be given.

"Applesauce" is like a kite; the way to get out of it is to give it to somebody else. In the belief of Mr. McAllister, the hero of the play of American life to three acts. It would spoil the play to tell its story before hand but from all accounts there are no full moments.

The Lowell Patton Artists are announced for the grand closing concert and entertainment on the third day of Chautauqua, according to what is covered by the local committee in charge. Lowell Patton and his assisting artist—Frank Patton and Lucile Hoot—present something entirely new, unique and original in what has been aptly called a "Patriotic Musical Program." There is no other enter- tainment like it and there is no program of recent years anywhere in the Chautauqua field that has so thoroughly won

## THE J. E. JONES LETTER

Miss Alice Willis is a guest of her mother, Mrs. Pratt, of Clinton.

Miss Louisa Lowe has employment in H. F. Tharston & Son's mill.

Mr. and Mrs. Lyman Wheeler were in Clinton on business last week.

Miss Beatrice Brown spent a few days with relatives in Hanover last week.

Mr. Louis Tyler is home from Boston University for the Thanksgiving recess.

Prof. and Mrs. W. R. Chapman have returned home from New York for the holiday.

Mr. Ira Griffith of Gorham, N. H., was a business visitor in town one day last week.

Mr. and Mrs. Edwin Hutchinson visited relatives in North Waterford a few days last week.

Miss Elsie Flint returned from Portland, Saturday, where she has been for a few days visit.

Mr. True Eames and family have moved into the Cleo Russell house on Park Street for the winter.

Mr. A. H. Gibbs is taking a vacation from his duties in the Benson & Gibbs garage on account of ill health.

Mrs. Daniel Edwards of Mechanic Falls was the guest of Mr. and Mrs. A. D. Forbes one day last week.

Mr. Norman Hall and family from West Bethel are moving into one of the rents in the Naimay Block.

Mr. and Mrs. Harlan Bartlett have moved into the Bailey house on Elm Street, occupying the upstairs rent.

Mrs. Walter Chandler of West Sumner was the guest of her daughter, Mrs. A. D. Forbes, and family over the week end.

Mrs. Ella Mansfield and Mr. L. L. Carver were in Portsmouth, N. H., Sunday to attend the funeral of Mr. Chas. Badger.

Dr. and Mrs. Frank Brown of South Portland were in town Sunday and Mrs. John Philbrook returned with them for the winter.

Messrs. Howard Bailey and Glenon Patterson left Monday for Ogunquit where they will work for M. R. Hastings in the woods.

Mr. and Mrs. Fred Tibbets came to Bethel, Saturday. Mr. Tibbets returned to Portland, Sunday. Mrs. Tibbets will remain for the holiday.

Mr. and Mrs. Fred Clark left Wednesday for Arlington, Mass., where they will spend Thanksgiving and the week end with their son, Albert Clark and family.

George Snow was called to Biddeford, Me., by the death of his father, Judge Snow. Mrs. Litchfield who is a niece of Judge Snow left Saturday to attend the funeral.

Mr. H. E. Jones met with a painful accident one day last week while working on the railroad. He was working on a log up tree when he slipped and fell, breaking a rib and lacerating his leg.

Mrs. Martin Hennessey of Vermont, from Me. and Mrs. William Forbes of Washington, Mass., and Mr. and Mrs. Foster of Alfred, Me., were here last week for the purpose of attending the funeral of Mrs. E. K. Fitch, who suffered a shock at the home of Mrs. D. M. Foster.

(Continued on page 4)

The limited appeal of an enter- tainment through public. Mr. Patton and his assistants came from Portland, Oregon. Mr. Hoot, the third member of the company, is from Gotham.

Junior Chautauqua, the activities for the boys and girls between 6 and 14 years of age, is said to be one of the most important phases of the Chautauqua Festival. If the enthusiasm of the children who have attended Junior Chautauqua is any indication, it will be well worth every child's while to save up his pocket money and have the "Patriotic Musical Program." There is no other enter- tainment like it and there is no program of recent years anywhere in the Chautauqua field that has so thoroughly won

## BETHEL AND VICINITY

### RADIO REGULATION

Important events are "doing" in the radio world. The telephone inter- ests have apparently dropped out of the broadcasting field, and so far as big business is concerned the Radio Corporation of America appears to have volunteered to carry on the master job of supplying the country with its programs of amusement, a good deal of which is to be "next to advertising." Mary Garden, Will Rogers, the New York Symphony Orchestra, the Goldman Band, and a grand and light opera company were on the air the other night when M. H. Aylesworth introduced the National Broadcasting Company of which he is president.

The question of the control of radio will be taken up in Washington as soon as Congress meets. The great business interests, now headed by the Radio Corporation of America, which is a step-child of the General Electric Company, will press for legislation that will safeguard their interests in broad- casting. These people who have spent millions to develop the art, very natu- rally expect the Government to play fair with them in the making of new laws.

Secretary of Commerce Hoover has been the man in the national administration who has given closest attention to the Government's responsibilities to the people in this matter. It is assumed that radio direction under Hoover

(Continued on page 3)

## BRIDGE AND ROAD BEING REPAIRED

The bridge below Locke's Mills, known as "Johnnie's Bridge," is being replaced by one of cement, and the work is progressing rapidly considering the time of year. The approaches at both ends of the bridge are also being made more safe, the sharp turns being eliminated by widening the road. This place in the main traveled highway has been very dangerous, many accidents having happened there, one young woman having been killed in an accident there a few years ago. The news of this improvement will be welcome to the traveling public.

## MEETING OF CHAUTAUQUA GUARANTORS

There will be a meeting of the guarantors of the Winter Chautauqua at the home of Rev. S. T. Acheson, Satur- day evening, Nov. 27th, at 7:15 o'clock for the purpose of meeting Mr. H. B. McKinnle.

E. E. Garver, Sec.

## GRANGE NEWS

### LONG MT. GRANGE

Long Mt. Grange held a target at- tracted meeting to the hall Saturday. A fine dinner was served at noon and after the business session the lecture, Mrs. W. N. Akers, gave the following program:

Grange  
Reading, Mrs. George Andrews  
Reading, Mrs. Anna Akers  
Lecture, "A Century"

Mrs. Stevens, Miss Young  
Grange  
Reading, Mrs. Anna Burgess  
Lecture, "A Century"

## NORWAY BOY ACCIDENTAL- LY SHOT BY BROTHER

Fred G. Dunn, Jr., son of Mr. and Mrs. Fred G. Dunn of Norway, was accidentally shot by his older brother, George, Saturday afternoon.

Fred, who was 12 years of age, and his brother, George, 15, had started sport hunting. George was carrying the gun and was ahead of his brother. They had gone some forty rods from the house when Fred ran forward and gave George a push from behind.

George stumbled over a rock and at the same time Fred ran ahead of him and turned around and faced him. The gun was discharged and the charge struck Fred in the heart killing him instantly.

Medical examiner Dr. W. B. Raymond of South Paris was summoned, and ad- judged in a case of accidental shooting.

## ANDOVER MAN CELEBRATES 91st BIRTHDAY

Still another Maine resident steps up to offer proof that Ponce de Leon was wrong in his assertion that the South was the land of perpetual youth. Loren Dresher celebrated his 91st birthday at the home of his niece, Mrs. V. A. Thurston, Sunday. He received a post card shower from Lene M. Grange of which he was an active member for years, also gifts and money from friends in town and away.

During the summer Mr. Dresher has worked every day in his garden which was one of the best in town.

Save for a few days illness of heart trouble this fall he has enjoyed ex- cellent health and bids fair to live out the century.

## BETHEL SHOULD HAVE AN OUTING CLUB

Last year in the early part of Feb- ruary we had in Bethel, a very success- ful winter carnival. There was some excellent ski jumping witnessed by a large audience in spite of the fact that the jump was located at the Steam Mill some distance from the village. There were several interesting and exciting races entered into with much enthu- siasm by many of our young people and much enjoyed by the onlookers. In the evening we gathered in the William Hingham gymnasium where the prizes were awarded, following which there was dancing and other social activities.

The planning, the management and the execution of this carnival was en- tirely in the hands of the members of the Y. M. C. A. of Gould Academy. It is certainly much to their credit.

Since then several progressive citi- zens of the town have expressed their interest in winter sports and it has been suggested that an outing club be formed. The purpose of this club would be to promote the various out of door sports, with perhaps special emphasis on winter sports. During the spring and summer there are many things to attract us out of doors. In the winter there is not much incentive for us to get out, unless we have a great moving love for nature to compel us to leave the signs of civilization. An outing club, such as proposed, would furnish facilities for many delightful winter activities that would draw us away from our fires and occasionally, out to the open when we could let our lungs breathe the cool invigorating air, get some much needed stimulating exercise and drop the worries coming from the grind of our daily routine.

We are convinced with the best of natural facilities for such an outdoor club. We have plenty of snow and cold weather, and a distance to furnish interesting out of door activities. A beautiful background and we have a little out- door action on our part of interested people to make a winter outing club a great success and a credit to the town of Bethel.

During the winter there is very little activity of common interest. There is no common meeting place where we can come to contact with all our neighbors. We need a bridge. Here is an opportunity for a community en- terprise. Here is something of general interest which everybody can help and from which every individual would benefit from the faithful recreation that would be provided.

If this interests you come to the Academy building on the evening of November 23 at 7:30 where the matter will be fully discussed and organization get under way. We want your help.

A feature of the Christmas sale at Gould Chapel, Tuesday, Nov. 23, is a Remembrance Table. All articles on this table have been donated by absent friends. Sale begins at 3 o'clock. Tea will be served from 3:30 to 4:30.

## ARMISTICE DAY

As there was no public observance of Armistice Day in Bethel, the school will observe it and had special pro- grams in the afternoon appropriate for the day. As a part of the exercises Mr. S. T. Acheson spoke in the grammar school, Rev. Charles Eastern in the intermediate and Rev. C. L. Oliver in the third and fourth grades. Their talks were very helpful and made the occasion full of meaning.

There will be no school Nov. 24.

## GOULD ACADEMY NOTES

School closes on Wednesday for the Thanksgiving recess which lasts until Monday.

Tuesday evening, Dec. 7, is the date set for the annual Donors' Day exer- cises at Gould Academy. The principal number on the program will be an address by Prof. Ernest C. Marriner of Colby College, who always has a worthwhile message for his hearers.

The school is most fortunate in obtain- ing the services of Prof. Marriner as he is unable to respond to many of the invitations he has to speak. A short musical and literary program will pre- cede the address. Every alumni and friend of Gould Academy is urged to reserve the evening of Dec. 7 in order that he may share in this observance.

A cordial invitation is extended to all who are interested in the school.

The losers gave a pleasant social on Friday evening to the winners in the recent contest to obtain subscriptions for the Curtis Publishing Co.

The Forensic Society is preparing for a public debate to be held some evening before the close of the term.

On Thursday evening, the charter members of the Varsity "G" Club held their first meeting of the year. The purpose of this meeting was to initiate the new members who had won a let- ter in one of the major sports. The new members are John Adams, Earl- yn Wheeler, Clarence Race, Homer Greg- gory. The charter members are Philip Hamill and Charles Austin; faculty advisor, Coach Kennedy.

The purpose of the Club is to keep the "G" on a high level and to permit school spirit and sportsmanship.

The initiation was very impressive and the older members gave the new members a warm reception.

After the initiation the officers for the coming year were elected. They are: President, Charles Austin; Vice president, Earl- yn Wheeler; Sec. and Treas., Homer Gregory.

## JUNIORS 25—FRESHMEN 14

The Juniors defeated the Freshmen 25-14 Monday afternoon of last week. Holmes and E. Wheeler starred for the winners, and Saunders and Parsons for the losers.

## STOLEN CARS RECOVERED IN OXFORD COUNTY

Many Ford owners in and around Norway, South Paris and Welchville were considerably wrought up last Thursday when Chief Arthur H. Field of the State Highway Police, with a number of his men, seized a number of cars, that were alleged to have been stolen in Massachusetts. The owners supposed that they had bought the cars legitimately.

A trap set by the officers finally net- ted J. A. Baldwin of Boston, supposed to be the "master mind" of an organi- zation of automobile thieves who have been operating in Oxford County. He was arraigned in Portland and held un- der bonds of \$10,000. It is thought that he will be surrendered to the Massachu- setts authorities. Other arrests are ex- pected.

The machines which had been dis- posed of in this section were repre- sented as having been sold on the instal- ment plan, and repossessed by a finan- cing company for failure to make the required payments. Most of the cars were of the 1925 closed model Fords.

The cars were taken by Chief Field and his assistants to the garage of Rip- ley & Fletcher Co., at South Paris and will remain there until the claimants have the opportunity to inspect and prove their property.

Cars were taken from the following persons who supposed that they owned them: A. B. Graver of Welchville, E. C. Edmunds, G. D. Hollis, Harold Mill- ett and E. L. Bean of South Paris, Miss Christine Leavitt and Donald Andrews of Norway, E. J. Stone, Ralph Mafus and Clarence Meserve of Mechanic Falls, Ralph D. Archambault of Poland Corner, and P. E. Talbot of Welchville.

It is expected that more cars will be taken as the investigation goes on.

Frank Coffin of Berlin, N. H., appears in connection with the disposal of these cars, and is said to have told the officers that he had disposed of about one hun- dred cars in the last two years, sup- posing that the business was legitimate as it was represented by Baldwin.

## FORMER MASON MAN FATAL- LY HURT IN NORWAY

George Eugene Mills of Orlfield was fatally injured Tuesday afternoon of last week when his horse became frightened at the collapse of an um- brella on Green Street, Norway, and ran. Mr. Mills was tangled in the reins and was dragged some distance, sustain- ing three scalp wounds. He was re- moved to his home and his wounds dressed, and no evidence of internal injury was discovered until the next day, when he became unconscious, and died away about four o'clock in the afternoon.

Mr. Mills was a native of Mason, and was 71 years of age. He leaves a wife, one daughter and one son.

## BOY SCOUT NEWS

The Boy Scouts will meet Monday night at 7 o'clock at the Legion Rooms. Tuesday night after school the Scout Master and seven Scouts had a hike to Mr. Howe's camp on the Bangs Pond road. The boys cooked a fine oyster stew. Those who were absent missed a good time.

## STATE OF MAINE WARRANT FOR SPECIAL ELECTION

County of Oxford, ss. Town of Bethel To Hiram M. Forbes

Citizen of the Town of Bethel You are hereby required in the name of the State of Maine, to notify and cause the inhabitants of the Town of Bethel qualified to vote, to assemble at Odeon Hall on the fifth Monday of No- vember, the same being the twenty- sixth day of said month, in the year of our Lord one thousand nine hundred and twenty-six at 10 o'clock in the forenoon, then and there to give in their votes for a United States Senator.

The polls will be open at 10 o'clock in the forenoon and will be closed at six o'clock in the afternoon.

The selectmen will be in session at Selectmen's Office on Saturdays, Nov. 20th and 27th, for the purpose of re- ceiving the list of voters.

BEWARE, FAIL NOT and have you three and then this warrant with your oblige thereon.

Given under our hands in the Town of Bethel this 16th day of November in the year of our Lord, one thousand nine hundred and twenty-six.

FRANK A. BROWN,  
W. H. THURSTON,  
ROBERT D. HASTINGS,  
Selectmen of the Town of Bethel.

A true copy.

Attest: David M. Forbes, Clerk.

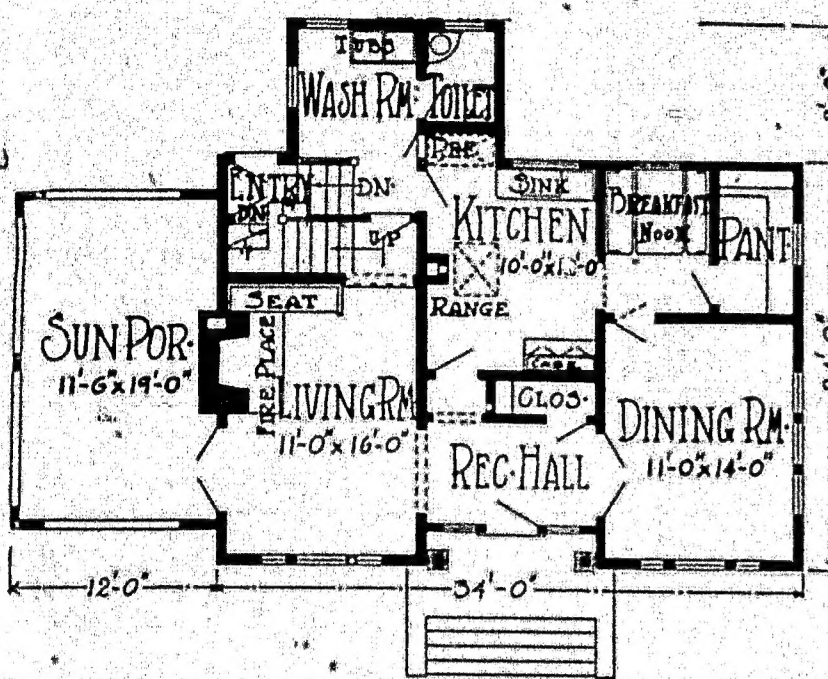

A quiet wedding took place Wednes- day morning, Nov. 17, at

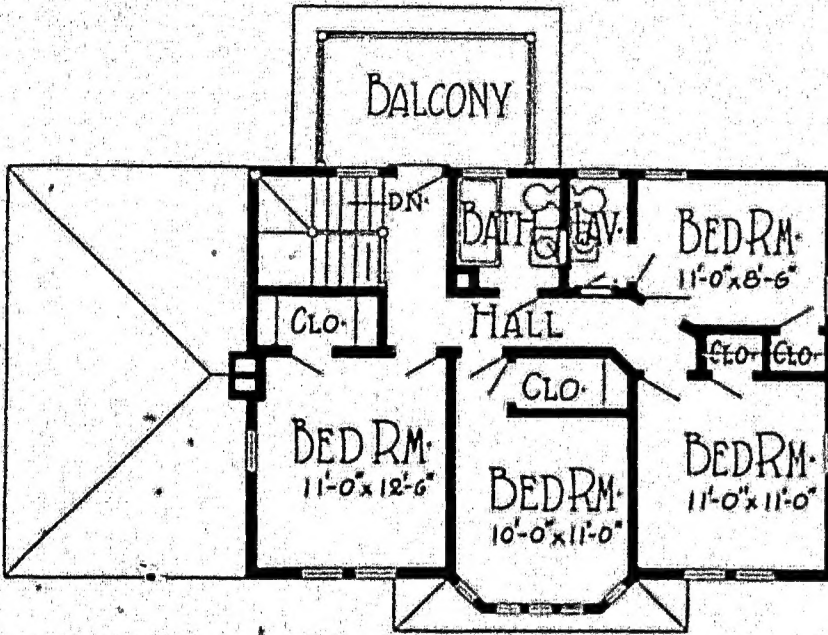

## Square Type Stucco House Is Both Economical of Space and of Cost

First Floor Plan.

Second Floor Plan.

By W. A. RADFORD  
Mr. William A. Radford will answer questions and give advice FREE OF COST on all problems pertaining to the subject of building for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1237 Prairie Avenue, Chicago, Ill., and only include two-cent stamp for reply.

Stucco makes an attractive finish for the exterior of a house. It is durable, will not crack, and by the use of color in the stucco pleasing shades are obtained.

The finish home shown in the illustration is an excellent example of the use of stucco. While this is a square home, the overhang of the roof, the bay window on the second floor and the porch with its artistic roof give it an attractive exterior appearance.

The house is 24 by 34 feet in dimensions, exclusive of the sun porch. Inside there are seven rooms, besides the large entrance hall, the bathroom and the washroom. It will be seen by the floor plans that the arrangement of these rooms is such that the work of caring for the home can be done easily.

The entrance door leads into the

large reception hall. To the left is the living room, 11 by 16 feet, in which there is an open fireplace, with double French doors opening into the sun porch. To the right of the reception hall at the front is the dining room. The kitchen has been placed nearly in the center of the home at the rear. It may be reached through the dining room, or from the reception hall. The washroom adjoins the kitchen at the rear. This arrangement eliminates unnecessary steps in passing through the rooms. Another feature of the home is the breakfast room adjoining the kitchen. This provides a place for the less formal meals and saves work for the housekeeper.

Upstairs there are four bedrooms and bath. All of these rooms open off a central hall, which is reached by the stairs running out of the end of the living room. These stairs are reached from the kitchen as well as through the living room. Each bedroom has a large closet and plenty of windows for light and ventilation.

It will be noted from the floor plans, also, that the foundation walls of the home are straight. There are no breaks, which add to the expense of constructing both foundation and roof. The basement is the same size as the house and provides plenty of room for storage and heating plant.

### Pick Builder You Can Depend on for House

When you make a purchase on which you may have to depend for a lifetime's service, your thought is "how good" rather than "how cheap."

This is especially true when the heat costs but little more than an inferior product. It is in the highest degree true of house wiring. You will never see the most important part—the part that is hidden behind the walls; you cannot inspect it before buying.

How, then, shall you choose? The answer is, "On faith"—faith in the responsibility, experience, skill and good repute of the electrical contractor who is to install it—faith in his use of only the highest quality material.

Only when a contractor has demonstrated that he possesses these qualifications and that all his material is invariably of the best, has he earned the right to your confidence.

### Annual Floor Treatment

When a varnished floor begins to show the effects of hard wear, once a year or oftener, if necessary, sandpaper it lightly and put on a new coat. The habit of doing this every spring in city and country houses and in office buildings preserves the floor, its appearance of good floors.

### Fire-Stopping of Walls and Partitions Essential

One of the most useful safeguards against fire hazards in dwelling construction is the fire-stopping of walls, partitions and floors. Fire tends to spread upward. Hollow walls and partitions follow spaces back of furrows on masonry walls, and even hollow doors offer inviting runways for the rapid communication of fire from cellar to attic and from side to side. The remedy lies in adequate fire-stopping which will make an all-lumber residence considerably safer against the spread of fire than masonry wall and lumber floor construction without fire stops.

### Steel Casement Window

The steel casement window affords more light than other types of windows in openings of equal dimensions. Thus it often is used to give the same amount of light through a smaller area.

### Roofs Become Attractive

There was a time when roofs were not necessarily artistic. They were thought of more in the terms of protection than of beauty. Today, attractiveness is the paramount factor.

## BIG LIGHT INSURES AGAINST AIR ATTACK

Makes Reading Easy Forty Miles Away.

New York.—A 2,000,000-candle-power searchlight, the largest in the world, with a light intensity 80 times as great as all the lights on all New York city's Great White Way combined, was shown to the public for the first time recently at the Electrical and Industrial exposition. So powerful is this searchlight that a man 40 miles away could see to read his newspaper by it, and those operating the light can clearly discern objects at a distance of five or six miles.

At least 10,000 persons crowded around the exhibit of the coast artillery on the third floor of the exposition to look at this remarkable searchlight and to listen with awe while Lieut. F. A. Mitchell, U. S. A., recounted the wonders that it could perform.

Among the most interested spectators was Arthur Williams, president of the electrical exposition and vice president, commercial relations, of the New York Edison company, who pointed out, incidentally, that the first incandescent lamp—perfected by the great Edison exactly 47 years ago—had a light intensity of 10 candle power.

Makes City Safe.  
The Sperry searchlight is part of an exhibit which Lieutenant Mitchell believes insures New York city against any possibility of such aerial attacks as wrought havoc in London and Paris during the World war. Against the anti-aircraft devices on display at the Electrical exposition, Lieutenant Mitchell said, "Zeppelins would stand no chance at all and smaller aircraft very little."

The 2,000,000-candle-power searchlight, the construction of which was completed just a few months ago, represents an improvement over previous models, not only in regard to power, but especially because of its resistance to hard usage and its convenience in handling. Carried on a truck from which the current is supplied by a small generator, the searchlight is so perfectly balanced that a child could direct it.

Another anti-aircraft device now on view for the first time at the exposition is a light-finder, described by Lieutenant Mitchell as one of the most important recent developments in the field of anti-aircraft fighting. The light-finder, an adaptation of the French government. There are only eight in existence, and the United States has four of them.

Can Detect Planes.  
Still another device is a great listening machine, one of several with which the United States is experimenting. By means of this instrument, which resembles a gigantic spray of Easter lilies, painted drab and lying on its side, the approach of enemy airplanes can be detected ten and twelve miles away.

Discussing the enormous strides in anti-aircraft work made since the beginning of aerial warfare, Lieutenant Mitchell said that in 1914 the French were bringing down one plane for every 13,000 shells fired, while at the close of the war, the United States anti-aircraft forces were shooting down one plane for every 200 shells fired. In recent tests at Fort Tilden, Lieutenant Mitchell said, our gunners scored one hit in every twelve shots against the flying targets.

"When it is considered," he said, "that a battery of three-inch anti-aircraft guns—the most efficient weapon against the airplane—can fire 30 shells a minute, which at the rate of one fatal hit for twelve shots means slightly better than four hits every minute, you can see that, as the anti-aircraft men figure it, Zeppelins have no chance at all and airplanes very little."

### Pole Cat Sole Resident

of Town That Was to Be  
Lofoten, Texas.—The sole resident of Lofoten is a polecat; this sole structure of the "city" is a white structure bearing the word "Lofoten" reared high over the plains.

But despite this paucity of citizens and absence of buildings Lofoten appears on all good Texas maps, is on a good railroad, has a first-class highway at its front door and is distinguished by a grassy lawn that covers the whole town.

The town, in fact, is one of those lost towns that sometimes spring from the ending of a railroad. The ground was laid off as a townsite, but the town never materialized. That was 15 years ago. The railroad was built, the highway was constructed, the town was named, but nobody settled there except the beautifully striped polecat. This animal has been there so long that he is accepted as an institution and receives a solitary entry of his domain.

### Yodling Lost Art in Switzerland Mountains

Lawrence—Yodling is a lost art in Switzerland. Shepherds and farmers look askance at American tourists who ask them to yodel. A party of tourists visiting Switzerland repeatedly asked natives for a yodel or two. None responded. They all looked puzzled. Suddenly, just around a bend on the main road, came the thrilling notes of a perfect yodel and the visitors hurried to get a glimpse of the performer. He proved to be a lusty American tourist.

## KEW GARDENS OWE DEBT TO GEORGE III

Director Tells of Great Aid Given by King.

Washington.—King George III, the royal bogey man of early American history, may not have "known his oats" in the matter of colonial politics, but he was no fool when it came to knowing other plants and securing the best scientific and economic results from them, according to the testimony of Dr. A. W. Hill, director of the Royal Botanical gardens at Kew, England, who is touring the United States on a series of visits to American botanical laboratories and gardens.

The Kew establishment, now the largest botanical gardens in the world, was initiated by the mother of George III, who set aside two adjoining palace gardens for this purpose; but it was George himself who, through his friendship for the early English botanist, Sir Joseph Banks, really gave shape and purpose to the donation and started the immensely profitable practice of making Kew the headquarters for the transplantation of new and valuable tropical species from one British colony to another.

Since that day, Dr. Hill states, practically every important transplantation of plant industry in the British empire has passed through Kew. Among these have been the establishment of the Para rubber industry in Malaya, the transfer of the cinchona quinine tree from South America to India and the East Indies, and the development of the vast cocoa plantations in West Africa.

But King George and the botanists of Kew must not be given credit for starting the business of plant introduction, though they were the first to make a science of it, Dr. Hill says. In early post-Columbian days the Spanish galleons plying between Mexico and the Philippines frequently carried valuable plant species from the new world to the old, and vice versa. But before the Spaniards there must have been other unrecorded voyagers among the brown-skinned peoples of the Pacific, for there are many plants, notably the coconut and the banana, whose wide distribution cannot be explained on any basis other than human carriage.

### Collects 70 Songs in Eulogy of Lincoln

Springfield, Ill.—Campaign songs, hymns of praise and funeral marches, more than 70 in number, eulogizing Abraham Lincoln, have been collected by Georgia L. Osborne, librarian of the Illinois State Historical Library.

"The first songs in honor of Mr. Lincoln," Miss Osborne said, "were campaign songs, including 'Freedom's Call,' 'We See the Break of Day' and 'A Campaign Song for Abraham Lincoln.'"

"A number of the songs were written in negro dialect, the most famous of which were 'I see de Way,' 'The Day of Liberty's Coming,' 'When Will Disraeli Be There,' and 'Gib Us Darkies Love.' Other songs were written in negro dialect, the most famous of which were 'I see de Way,' 'The Day of Liberty's Coming,' 'When Will Disraeli Be There,' and 'Gib Us Darkies Love.'"

Numbered among the songs written after Mr. Lincoln's death were "The Nation in Tears," "A Nation Mourns Her Martyred Son," "The Death Knell is Tolling" and "Rest, Noble Chief."

### Fire Machine Withdraws Smoke for Firefighters

Minneapolis, Minn.—Minneapolis firemen may soon lose the application of "smoke eaters," for they now have a machine that literally "eats" the smoke for them at fire.

The device resembles the "steamroller" type of fire engine. It has a battery apparatus with a suction fan attached to a huge hose, about 15 inches in diameter. The hose is run into smoke filled rooms and the smoke drawn out. It has proven especially successful in fighting stubborn basement fires, where there is much smoke but little fire.

### Extra Hazardous

New York—Rodeo riding is listed by insurance companies near the top of hazardous occupations. Men engaged in polo, pugilism or aviation are held better risks.

### One Fir Tree Stump Makes Home on Auto

Montevideo, Wash.—A tour in a Douglas fir log is under preparation by E. W. Wade, who is making an automobile body from a giant tree.

The apartment plan calls for a combination bedroom and living room with two folding beds, two closets, a combined kitchen and dining room and china closet. The log home is to be electrically lighted throughout and have electric cooking appliances. The stump measured 9 feet 4 inches across and is now 10 feet long, weighing 4,250 pounds. When complete the house goes upon a truck and trailer.

## BRING NEW ANIMALS FROM TANGANYIKA

Zoo at Washington Gets Queer Specimens.

Washington.—Quite as fascinating in their way as the giraffes and monkeys are certain other new additions to the national "zoo" which have just been brought back by the Smithsonian-Chrysler expedition from Tanganyika territory in Africa. These "forgotten" ones are less attractive to the children, but will hold an undeniable interest for the followers of science.

There are a number of African aquatic frogs. Unlike the frogs of this country, they do not hop, for they never go about on land at all. They are rather small, with mouse-colored backs, and are distinguished by very large webbed hind feet. They live constantly in the water, and often poise there motionless, balancing on their webbed hind feet.

Fifty chameleons on display. Fifty chameleons were in the collection. They are characterized by peculiar tongues, which extend for a length equivalent to the length of their bodies, tails which curl up like corkscrews and eyes which operate separately from each other.

There are also strange spring-tailed lizards and monitor lizards that live on crocodile eggs. Three species of these latter were brought back.

The expedition was unfortunate in losing the pangolin, a scale-covered anteater which, as far as it is known, has never been kept in captivity anywhere but Africa for more than a month. The pangolin lived for four of the eight months the Smithsonian expedition lasted, but died before the end of the trip. The pangolin is related to beasts of prehistoric times and would have been an interesting addition to the collection at the national zoo.

Hyacinth readers will recognize in the hyraxes brought over with the expedition the "coony" of biblical annals. The hyrax, though only the size of a rabbit, is a near relative of the elephant, having the same toe structure. When these animals are scared the hair on the middle of their backs stands up straight, separating itself from the rest.

### Caracal Baby Brought Back

An African caracal baby survived the trip, much to every one's surprise, for they are difficult to transport. It is probably the only one that has been brought to this country in the last 15 years. It is a beautiful animal and has become quite tame from constant association with man since early infancy.

The new contributions to the zoo, all but the hooved animals, which are still in quarantine, are now being put in their proper places. The entire collection will more than double the population of the zoo.

Aside from the valuable additions to the zoo, the expedition quite incidentally fished another cause. F. G. Carnahan, one of the men to accompany Dr. W. K. Mann, superintendent of the zoo, made a study of the snake secret societies in Tanganyika territory and brought back for analysis many of the herbs and concoctions which the natives use in treating snake bites and various diseases. Before he left, Mr. Carnahan was initiated into one of the secret societies.

### Stars May Create New Worlds, Says Scientist

New Haven, Conn.—Modern science has no one consistent scheme of interpreting physical phenomena and has become "wise enough to admit it," Dr. Robert A. Millikan, discoverer of the Millikan rays and Nobel prize winner, said in the first of the three lectures at Yale university.

Dr. Millikan outlined the major discoveries of recent years and said there were experimental and theoretical reasons for believing that the mass of stars is being actually transformed into light and heat and is being radiated away into the outer stretches of space, where it may be giving birth to new worlds. "This," he said, "was an 'inevitable speculation.'"

Saying that the nineteenth century conceptions were "grossly inadequate," Dr. Millikan said that scientists were working with enthusiasm and hope because they had succeeded in our lifetime in finding more new relations in physics than had come to light in all preceding ages put together and because the streams of discovery as yet shown no sign of abatement.

### Modern Faces Lopsided, Sight Expert Declares

London.—Modern faces are too lopsided to meet the beauty requirements of the old masters, says H. L. Taylor, chairman of the British National Council for the Preservation of Eyesight.

Men, and especially intelligent men are much more likely, in his opinion, to have the right side of the face more developed than the left side. This is due to using the right eye extensively, with the result that it eventually moves away from the nose further than the left eye.

Modern women also suffer from this defect, Mr. Taylor declares. He says it is rarely that one finds women with the symmetrical, oval faces painted by Michelangelo and Raphael. Even in Italy these types are not now numerous among peasant women.

## Drink Water to Help Wash Out Kidney Poison

If Your Back Hurts or Bladder Bothers You, Begin Taking Salts

When your kidneys hurt and your back feels sore don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salt which helps to remove the body's urinous waste and stimulates them to their normal activity. The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of good water—you can't drink too much; also get from any pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys may then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate clogged kidneys; also to neutralize the acids in the system so they are no longer a source of irritation, thus often relieving bladder weakness.

Jad Salts is inexpensive, cannot injure, makes a delightful effervescent lithia-water drink, which everyone should take now and then to help keep their kidneys clean and active. Try this; also keep up the water drinking, and no doubt you will wonder what became of your kidney trouble and backache.

## Today's Big Offer to All Who Have Stomach Agony

Read About This Generous Money Back Guarantee

When you have any trouble with your stomach such as gas, heaviness and distention, why fool with things which at best can only give relief. Why not get a medicine that will build up your upset, disordered stomach and make it so strong and vigorous that it will do its work without any help.

Such a medicine is Dore's Mentha Pepsin, a delightful elixir that is sold by your local dealer and druggists everywhere with the distinct understanding that if it doesn't promptly help you your money will be gladly returned. It has helped thousands—it will no doubt help you.

## HALE'S HONEY OF NORTHERN AND T.A.R.

There's nothing like this for breaking up colds—amazing relief to sore throat, head and chest—Safe—Money back, 30 cents at all druggists.

# NO NEED TO COUGH NIGHT AFTER NIGHT

Balsam Has No Equal For Conquering  
Hang-On Coughs.

After all there is no present day cough syrup that can take the place of this old time proven prescription made from the rarest herbs nature offers for coughing and stopping coughs. This old fashioned herb balsam is for the stubborn hang-on cough that keeps you awake nights, and it is this kind of a cough it quickly conquers. Here's what prominent druggist says about Adams' Botanic Cough Balsam.

"The superiority and excellence of the balsam used for 60 years is entirely explained as follows: If I were to put enough remedy as good as Adams' Botanic Cough Balsam with the same well known ingredients it would take me 5 hours and I'd have to charge an exorbitant price. The public is fortunate that they can obtain it for only 35 cents. No better balsam can be obtained and none more highly recommended for children. Contains no opiates."

It covers the sore infected part like a healing poultice and quickly soothes and conquers the most stubborn cough. First dose instantly relieves. Get rid of your cough. Get a bottle of Adams' Cough Balsam from your druggist.

## I USED TO DANCE TO MELLIE DUNHAM'S FIDDLE

By W. A. Kimball of Norway, Maine.  
As a youngster around Norway, Maine, I recall seeing Mellie Dunham, Maine's champion fiddler, scurrying across the snow on a pair of his home-made snowshoes. In fact, he always could travel about as fast on snowshoes as anyone whom I have ever seen.

Now that Mellie and Gram are much in the limelight I naturally imagined that it might be difficult to reach the old hometown folks, but I find that all this popularity and publicity has not for a minute gone to their heads. As Mellie says, "We are too old and staid to feel our oats over all the rumpus."

In the old days when I was going to dances I recall Mellie's orchestra as having for second fiddle Bruser Hosmer, who was as tall as Mellie is short. Bruser was slow in action and just the opposite to Mellie, who works fast and for us over the old fiddle. Bruser used to have a sawdust box handy so that he could chew tobacco and squirt the juice with unerring aim into said box, which used to be within easy range.

Bruser always removed his shoes and donned good thick woolen socks. He massaged his legs and beat time with the upper leg swaying over his knee to the well known rhythm that Mellie led off with as first fiddler. An occasional bit of tobacco juice toward and into the sawdust box was about the only sign of undue activity that Bruser displayed and he was always set to play in the event the cows came home as far as get bog weary goes.

Mellie is quick of action. After tuning up the old fiddle he would remove his collar and necktie and unbutton his shirt front a few buttons. With a red handkerchief wrapped around his neck he was all set for the rest of the night and early morn of fiddling for the country dances. Just about the time that Mellie would get tuned in to the organ Bruser would get around to Mellie "Sound yer A and see if so jibe." If Bruser fished with Mellie they were off for the first dance. Mellie with short quick strokes of the bow and Bruser with the slow, alternating bowing of second fiddle was a distinct contrast.

On a Boston Fancy we all lined up after Mellie and his band had fiddled a mile. The first couple to rush to the stage would have first position as had couple so that there was usually a rush for this place. Once the dance

was on it was fast and furious. I recall balancing with some good husky farmer women and being lifted off my feet. As a youth with the dance craze age I weighed some ninety pounds. It would take a good husky man to keep his feet on the balance when some of the good old farmers' wives got hold of him. On a waltz the orchestra would on some pieces be playing double time but the natives knew just how to swing into the rhythm for the waltz. Mellie was always exact on time and rhythm.

Henry Ford has brought back to the present generation of young dancers the old-time music and dances which possibly they might never have seen or heard. Now the popularity of such music seems to take people by storm, for Mellie and his band were quite busy during the summer resorts after a very busy season in vaudeville on the Keith Circuit. Up around Maine during the past season many leading summer hotels had Mellie over to play for dancing and the older folks keenly enjoyed renewing the old time dances and music. The younger dapper age of dancers take to the music and dance the newer dances to the even rhythm that Mellie produces.

Near Mellie's home on a crossroad is the local farmers' grange where the natives drove for miles around in the winter and took in the weekly dances that Mellie used to run. Farmers would bring all the children over the snow on sleds and sleighs and even the wee babes were taken along when the temperature would be below zero. Plenty of furs and heavy woolen robes kept all hands warm for the trip to and from the dance hall. The babies had a room set off upstairs where they were put to bed and slept through the dances peacefully.

I recall a middle-aged dancer who used to take in Mellie's dances. He had one wooden leg and it always amused me to see the way he handled himself on the dance floor. He could dance as well as anyone. The ladies used to like to dance the waltz with him; he had the knack. He would pivot on the wooden leg and make a very smooth turn. On the reverse turn he would drag the wooden leg around nicely and without any apparent lack of smoothness. A rubber tip on the end of the leg made it quite noiseless. Farm and Fireade.

## CANTON

The Canton High School Athletic Association fair held at the Opera House, Friday afternoon was a success. The hall was prettily decorated and the booths of the Seniors, Juniors, Sophomores and Freshmen were unusually attractive. The fancy work booth was in charge of Catherine Abbott, the food table was presided over by Velda Bicknell and Alice Hardy, the vegetable table by Sara Walker and Thelma Crutcher, and the candy table and grab bag by Evelyn Reed and Julia Bicknell, who did a good business. One attractive booth was the "chance" corner which was entertaining to the young. A boxing match and a "mystery man," or strong man, was a part of the entertainment. A free concert was given, consisting of piano solos, violin solos, vocal solos and violin duets, with piano accompaniment, which was much enjoyed. Those receiving prizes were C. W. Walker, a blanket; Mrs. A. S. Bicknell, sweater and hose; Arlene Robinson, a rug; Mrs. S. B. Ellis, a goose; dolly, Harold Doolley; black light, D. A. Bialce. The three got drama, "Sunshine," was presented in the evening to a large audience, all taking their part creditably. A dance followed with music by Lavorgna's orchestra.

## Mr. and Mrs. Horace L. Worden are

receiving congratulations on the birth of a daughter, who has been named Margaret Ellen.

Mrs. H. F. Richardson and daughter, Frances, and Mrs. Edie Davenport have been visiting relatives in West Paris and East Sumner.

Mr. and Mrs. D. A. Bisbee attended Ladies' Night of Androsceggia Royal Arch Chapter at Livermore Falls last week.

Mrs. Helen Swasey has gone to Massachusetts General Hospital for treatment. Her daughter, Miss Marie McLean, accompanied her. Her friends in Canton are sending her a post card shower. Her son, Lyman Swasey, is stopping with his aunt, Mrs. Emory Jones, during her absence.

Mr. and Mrs. W. S. Ingersoll of Norway were Sunday guests of their daughter, Mrs. A. L. Tirrell, and other relatives in town.

Mr. and Mrs. W. A. Lucas will entertain on Thanksgiving Day, Mr. and Mrs. A. L. Newman of Auburn, Mr. and Mrs. Charles H. Towle and son, John, of Dixfield, Mr. and Mrs. Herbert A. Webster of Portland.

Mrs. Clara Paine and two children of Norway have been guests of Donald Kilbreth and wife.

Mr. and Mrs. Elmer R. Lane and son, Richard, of West Peru have been guests of her parents, Mr. and Mrs. C. E. Richardson.

Mr. and Mrs. Howard Reed of Springfield, Mass., are receiving congratulations on the birth of a daughter, who has been named Janet Southworth.

Miss Kate Jek of Woodford has been visiting her aunt, Mrs. W. B. Gilbert, and cousin, Mrs. Hazel Glover. Edwin Brown is employed at the plywood factory.

Miss Flora Harriman has resigned as teacher of mathematics and science in Canton High and Prof. John C. Parlin is taking her place.

A large number in Canton are ill with whooping cough and many children are out of school.

Irving Towns of No. Anson has moved his family to Canton.

Arthur Tirrell and son, Bartley, H. F. Richardson, Edward Richardson and Philadelpa Uigle returned Sunday from a week's hunting trip to "H" pond, bringing home four good deer.

D. L. Cameron is having a vacation from his duties as station agent and with his wife is visiting in Staten Island, N. Y.

Geo. Johnson is planning to sell his stand near the fair grounds and build a house in the village.

Word has been received of the safe arrival of Chas. West and Mrs. Lottie McCune at Southern Pines, N. C., where they will be employed at "The Hollywood" for the winter.

Asa Campbell dedicated his right

## shoulder Thursday afternoon.

Robert Stratton of Rumford Center has been visiting his aunt, Miss Lida Abbott, and attended the school fair.

Mrs. Susan Shackley has returned to Canton, and is stopping with her son, Samuel Shackley.

## EAST BETHEL

Miss Dorothy McDowell of Portland recently visited Mr. and Mrs. Guy Bartlett.

Mr. and Mrs. Z. McAllister of Lovell, Me., were over the week end guests of Mr. and Mrs. Porter Farwell and other relatives in town.

Mrs. Etta Bartlett has returned home from Framingham, Mass., where she has visited the past six weeks.

Miss Ethel Blake and friend have returned to Malden, Mass. They were accompanied by Mrs. Carrie Bartlett, who will be the guest of Mr. and Mrs. George Blake and family for several weeks' rest.

Mr. and Mrs. Wm. S. Hastings and family entertained as Sunday guests, Mr. and Mrs. George Cole and son, Keith, Mr. Wm. Yatts of Greenwood, Me., also Mrs. Hastings' sister, Miss Evelyn Cole, and friend of Gould Academy over the week end.

Mr. James Baines is working for Bartlett brothers.

Mr. and Mrs. C. E. Bean of Rumford will be Thanksgiving guests at her home here.

## SKILLINGTON

Mrs. Lennie Howe has returned to her son's, Mr. Winfield Howe's, after spending a few days at Hanover.

Helen, Charles and Edwin Anderson and Jane and Lloyd Chapin are ill with whooping cough.

Mrs. James Walker and friend from Norway spent Wednesday of last week with Mrs. Charles Crosby.

Mrs. Alma Mitchell is visiting at Mr. and Mrs. A. B. Sanborn's.

Miss Hazel Lutton of West Bethel is working for her sister, Mrs. Archie Young, who has been ill the past week. Mr. Durward Mason of Portland and Mr. Morton Milliken of Lewiston were week end guests at Mrs. Charles Crosby's.

Mr. Winfield Howe is spending several days at Magalloway on a hunting trip.

## WEST BETHEL

Mr. and Mrs. Roland Kneeland and daughter were in Portland, Thursday, Mrs. Evelyn Goodridge returned home with them.

Herman Bennett shot a large bear Saturday while hunting in Albany.

Mr. and Mrs. Chas. Howe and Miss Mildred Morrill of Rumford were Sunday guests of relatives in town.

Mrs. Sarah Allen returned Saturday from Stratford where she has visited relatives for the past two months.

## ANOTHER WOMAN'S SACRIFICE

By H. M. EGBERT

(Copyright by W. G. Chapman.)

Nurse Winifred stood beside Marie's cot in the children's ward, waiting for the doctor's verdict.

"I'm afraid we'll have to send her home tomorrow," he said at last. "That hip disease is completely cured. It has been for weeks, you know. We've kept the child principally well, because you have taken a fancy to her," he said, smilingly.

"I like them all," said the nurse. "But this little five-year-old—poor little motherless thing! Doctor, I don't like to think of that father of hers taking her."

"I'm afraid he's got the law on his side," the doctor answered. "Besides, what's the matter with him?"

"I don't like him, doctor," answered the nurse. "I don't think he's the sort of man who would be kind to a child."

"Nonsense!" said the doctor, brusquely. "Anyhow, she can't stay here forever."

"Just one week longer!" pleaded Nurse Winifred.

"Very well. One week. But no longer," said the doctor, as he turned away.

Nurse Winifred felt the tears come into her eyes. She had mothered Marie Clauson ever since the child had been brought there by the father, a year before. The mother was dead; the father, who came every week, seemed to like the little girl after his fashion, but Nurse Winifred did not like him. Dark, swartling, seldom, he never noticed her, never did anything, but all by his cot side and glower at his child, who was plainly almost afraid of him.

When Marie learned that the father was to come home with her father in the near future she was heartbroken.

"Promise me you'll come too, nurse," she pleaded. And Nurse Winifred, to save the child a week of heartbreak, promised that she would.

She broke the news to the father the next day. He only glared at her morosely. She found herself wondering whether he would know how to care for the child, whether there were any women in his family. He was a maker of stained glass, she had learned, and lived in two or three poorly furnished rooms in an unfashionable rather Bohemian part of the town. Still, a father has rights. But Nurse Winifred felt that it would be scandalous to let the child go to a home where there would be no woman to care for it.

"I suppose you will get some one to look after the child," she suggested. "I am capable of looking after her," answered the father.

"But you want a woman to care for her. You can't look after a child yourself!"

"I'll have no woman in my home," he almost shouted at her.

"You'll have to," answered Nurse Winifred deliberately. "Otherwise, you shall not get possession of the child."

"Maybe you'd like to look after her yourself?" jeered the man.

Nurse Winifred flushed. "I certainly should," she answered coolly.

"However, that is not the point. I shall speak to the hospital authorities."

And she took the matter up with them. They agreed that it might be possible to have the child committed to an institution. "But it wouldn't be wise," was the verdict. "No doubt the father will prove amenable to reason. You see the poor man's suspicions, and it would give the hospital a bad name."

The nurse retired, completely baffled. She thought about the matter all day, and asked most of the night. Then she arrived at her decision. When the father came she told him plainly that she was willing to give up her spare time to the child. She would come for a couple of hours daily. If he was unwilling she would have the child taken from him.

The man looked at her with dull rage. He had not dreamed that she would take him at his word. "Well, I guess I can stand it for two hours a day," he sneered at length.

When the time came for the child's removal she accompanied him to a cot where he lived. It was a very little apartment, but nearly as bad as she had imagined. It consisted of five rooms, and the nurse was sure, the moment she set eyes on it, that a woman had had a part in the furnishing. Perhaps it was the draft another who filled her doubts. "I am being a practical woman," Nurse Winifred told herself as she prepared for the child's life in the flat.

"You'll have to have a cot," she said.

The man pulled out a cot of bits and pieces he had picked up. "Under what you want," he said coolly.

That was the beginning of the strange experience. The man's work room was at the end of the flat, a large room filled with glass of all shapes and sizes. Angels' heads stared out from between strips of lead. The floor was splashed with coloring. When the nurse came Clauson shut himself up and refused to see her.

Weeks passed. They hardly ever met. Clauson had given her a key and knew her hours. She would hear him at work in the room as she tended Marie. Gradually she began to see

that a certain affection had sprung up between the child and the father. She began to pity the lonely man. Once, when they met, she showed this sympathy, and she fancied that the look in his eyes was like that of a dog, starving for affection. But then the mask fell again, and he was gruffer than ever when they next met.

One day, as she was leaving, he came in and stood beside her.

"Well, how long is this going on?" he asked.

"As long as I am needed," she answered with spirit.

The man seemed suddenly to change. "Sit down a minute," he said. "I want to tell you that—that I am not ungrateful for what you have done. You are fond of the child. But you don't know what she means to me. I want to explain my rudeness."

"It will take a lot of explaining," thought Nurse Winifred; but she only waited for what he was going to say.

"I want to tell you," he continued, "that the child's mother is still alive."

"Then why don't you bring her?" demanded Nurse Winifred, starting up in consternation.

"Because she wouldn't come," he answered. "She never wanted the child. She hated the idea of giving life to her. She only cared for—so—eternity, and such things."

"Oh!" murmured the nurse, beginning to sense something of the tragedy.

"I wrote to her after she had left me. She ran away—she left a note for me saying that she couldn't live in poverty. I was not successful then. It was hard work to live. But she never cared for the child. I wrote to her, begging her to come back for her sake. But she refused. She secured a divorce from me in the West and married a rich man. The child meant nothing to her and does not remember her."

"After that experience I hated all women. I vowed that no woman should ever enter my home again. I resolved to bring up the child alone, to try to make her better than her mother was. But she had to go to the hospital, and—"

"I understand," answered Nurse Winifred gently.

"Then, when you came here I determined never to see you. But you showed me that there were some women who were different. And I am sorry. I know how you have given all your spare time in spite of the work in the hospital. So I want to make you a suggestion. I am not fit to care for the child. Take her away and bring her up as yours. I will pay you. I am doing well, and I can sign an agreement."

"Nonsense, Mr. Clauson," answered the nurse promptly. "I am willing to continue coming here. Marie likes me, and it is my greatest happiness."

Her eyes filled with tears. He made no answer, but went out of the room quickly.

But after that she had, more and more frequently, glimpses of the real man beneath the mask of indifference and selfishness. It was a slow process, it began when they put their heads together to plan for the girl's welfare. But it might have been infinitely slow had not Nurse Winifred suddenly failed to appear one afternoon.

The next day Clauson was at the hospital. They told him that she had been struck down with pneumonia from overwork; that there was no chance for her.

Nurse Winifred, lying in a coma, was wholly ignorant of the man who had been her life for seven days.

"There is one chance in a hundred," the doctor said. "It is the critical period. If she awakens . . . but she is not likely to awaken."

As the angels of death and life struggled with one another the sound of a man's grief reached the nurse's mind in its misty recesses. Faintly she opened her eyes.

"Live for Marie," he said.

"Live for Marie," she whispered.

"Yes! I will live!" she whispered back.

**Might Have Gone on**

**With the Quotation**

"By the way, knowing my great admiration for Lord Beaconsfield, tales and anecdotes connected with him were often brought to me by friends who knew how gladly I should bear them. Here is one told me by the late Duke of Sutherland whom I used to see a great deal of when he was at Stafford and had a flat in my street. Looking at the Hall's portrait, I was thus addressed by the favorite lord mayor:

"You may say in the words of Beaconsfield to Marlborough: 'Then hast I now, living, found a friend, all as the world women promise.'"

"Very appropriate," exclaimed the nurse, who never forgot the words of the doctor's threat spoken of in my "Unrequited Recollections."

"But why didn't he go on?"

"Go on—why?" asked Stafford.

"Heal me, and he said: 'Why, the next words are, and I fear that play the most fully for it.'"

"More Unrequited Recollections," Stafford.

**Their Identity**

"As we were coming along the road from the westward," we remarked, "we observed one man picking up a few small gravel, two more men flitting about the roadside and three other men asleep in the shade."

"That was the highway gang working themselves to death," replied the landlady of the tavern where we had dined. —Kansas City Star

## OSTRICH GRACES FORMAL FROCKS; SHOW NOVEL STYLING IN PAJAMAS

NOW that society is banqueting, dancing, attending opera and making merry until the "wee wee" of the morn, the mode is called upon to devise beautiful frocks for each lovely occasion. One of the fascinating fashions for evening this season is the pastel-colored supple velvet, or chiffon frock graced with long flues of self-colored ostrich.

Sometimes a shoulder ornament of the ostrich complements that which accents the modish irregular hemline. A very delightful evening frock of pale-green shaded chiffon recently appeared.

of old, we are liking the so-called "sleeping" pajamas right well. Maybe the popularity of pajamas is due to the fact that they present a novel opportunity to express one's individuality. Perhaps it is because they are so comfortable and practical. Whatever the cause, pajamas have found a recognized place among modern lingerie.

As a Christmas gift to one's nearest and dearest girl friend, pajamas ought to solve the problem most happily. Something we make our very own selves is always deeply appreciated.

A Delightful Evening Frock.

rived from across seas showed not only ostrich about the hemline in deep points and at the shoulder, but a third touch was added in the way of a moult of ostrich at the wrist.

The exquisite mauve panne velvet evening gown in this picture, which is a Doucet creation, artistically accents a unique hemline with drooping ostrich flues. There is an introduction of silver embroidery on the blouse front, with a knotted detail of velvet at the waistline, which are effective.

It is apparent throughout the evening mode that ostrich plays a very important role. Not only is the formal gown and wrap of velvet lavishly embellished with ostrich, but midday is

ated. Why not buy some pretty material and copy one or the other of the models shown in this picture? The model to the left was designed by a distinguished couturier, Madame Lemaire. It is developed of Britany crepe de chine, with broad slash in oriental effect.

There is a decided charm in the one-piece pajamas offered by Lemaire as shown here to the right. One finds a novelty touch in material and general design quite to one's liking when it comes to the intimate robes of one's boudoir. Therefore the miniature polka dots of the crepe de chine seem just the thing for pajamas with youth delights to don. The night

Two of the Latest Pajama Models.

Again carrying a huge ostrich fan. Indeed so pronounced is the vogue for ostrich, even fantastic hand bags are made of ostrich which covers a fabric foundation.

Young girls wear with simplest of fluted chiffon or velvet frocks, a hot tentacle of ostrich inset with colorful flouers.

The latest ostrich novelty is that which is gilded or silvered. In hundreds of rare and colorful weaves, ostrich thus treated appears in regal splendor.

An outcome of this vogue for ostrich is the long, long, reaching to the very hemline of the frock, or short, assuming the form of a fanciful neck scarf.

As a substitute for the nightgown

Buster Brown collar and tie, also the slipper and the charming details were wanted to please any young girl who delights in cunning frivolities, such as the made calling "clean" pajamas.

Appearing among the latest modes are the "Mexican" pajamas as the creator of this type is pleased to call them. They are thus captioned on account of the decided flare at the hem of the trousers, this being characteristic of the native Mexican costume.

Interest is mostly centered just now in the tailored pajamas. These pajamas are often composed of two contrasting materials, a solid color bordering a patterned fabric, is popular during the winter months.

## EXPERIENCE WESTERN

Found Cannery W Tiring

The fertile valleys of Oregon supply the tables of America with possible magic in tin. In one of the many canneries, a man named Schmidt played a game of cards with a woman named Schmidt. The woman was a girl. Often she forced her when she was hardly able to walk. At times she was found at home for she was unable to walk. For she was in this weakened condition. She tried various medical remedies, but none of them helped. Finally, she found a trial of the famous Vegetable Compound. "Everyone says I am a stronger girl," she writes, "and my friends who tell me that I am willing to take from women asking for the address of Julia Schmidt's address is Front St., Salem, Oregon. I feel that I am a stronger girl, too, will find better taking the Vegetable Compound."

## THE J. E. JONES LETTER

(Continued from page 1)

would insure recognition of the public service that has already been rendered by the Radio Corporation, and that would be satisfactory to the General Electric patents.

On the other hand the country is full of "independent" broadcasters and dealers, and these small radio interests are preparing a bitter fight against what they charge to be a monopoly of the air by the "trust." There are organizations in existence looking to upset the preconceived plans for control of broadcasting as voiced on several occasions by Mr. Hoover, and along lines wholly satisfactory to the General Electric-Radio Corporation.

Heretofore Congress has "paved up" the question of broadcast control on the ground that the art has not been sufficiently developed to make it clear to the legislators just what they should do about it. But that time has passed and now the struggle is waged between the "trust" and the "independents" with Congress between the fires and millstones of "fans" watching the struggle.

## HYDRO-ELECTRIC POWER

For twenty-five years Congress blocked the development of water power in the United States, but a Federal Power Act was finally passed in 1920, and since that time licenses have been issued by the Federal Power Commission that have placed in operation, or under construction, 3,000,000 horse power. (This is water power measured by horse power.)

The biggest new development is on the Susquehanna River in Maryland and Pennsylvania, and known as the Conowingo dam. This will produce 475,000 horse power. A new development on the Coosa River in Alabama, provides for 150,000 horse power. The combined power and navigation and development of the Falls of the Ohio, Louisville, Kentucky, is 135,000 horse power.

Since the introduction of electric transmission of power produced by water the possibility of furnishing water power to even the most remote sections of the United States has become, first, a possibility; second, a probability; and now it is an accomplished achievement.

## A TREMENDOUS RESOURCE

It is no secret that there is enough undeveloped water power in the United States to furnish a very great percentage of the entire power needed for the Nation's industries. And it just as well known that coal can be burned at the mouth of the mine, converted into steam and its power carried by electric systems to points hundreds of miles away.

Power production of this kind has been demonstrated within recent years. At one time Southern power companies combined production and distributed electrical energy over several hundred miles of country. There remains less

than fifty miles of the entire Western coast that is not capable of being linked up right now so that electrical energy could be transmitted over hydroelectric lines to every spot along the coast from Canada to Mexico.

## WASTEFUL PROCESSES OF TODAY

It will be a sorry day for the railroads when they have to give up the major part of their freight business, which is that of hauling coal—hauling it from the mines to terminals, where it is redistributed until it gets into individual coal bins. In this great waste of industrial effort the railroads are engaged in exact processes of transportation, that future generations will ridicule.

Investment surveys have shown that water power development in a few states would conserve 50,000,000 tons of coal a year between Boston and Washington and save \$100,000,000 annually in the particular bill for this region.

The best authorities agree that there is more than 65,000,000 horse power of water available in the United States, and that there is now generated by means of steam more than 50,000,000 horse power. Government and other industrial experts are agreed that water at the dam and coal at the mine can almost over the transmission lines and furnish "fire by wire" sufficient to provide for all the power needs of the United States.

All this leaves out of consideration the great things that can be produced by petroleum.

## WHAT'S YOUR HURRY?

Leading officials of the United States Government wholeheartedly approve of King Ferdinand's request that Queen Marie get out of this country and back to her own home in Bucharest before Christmas. The Queen has certainly behaved splendidly since she has been in this country, but the King is anxious to see her, and the Washington officials who have been uneasy for the safety of the royal head will be pleased when the time comes to bid Marie farewell.

## MEDICINAL LIQUOR

General Lincoln C. Andrews, the Push Tah of American prohibition enforcement, is greatly concerned because the supply of "good whisky" in the country is running low. He says he will recommend that manufacture must be resumed in order to insure adequate stock for legitimate use. He says that the distilleries should be permitted to make a total of about 3,000,000 gallons a year in order to catch up with the loss due to evaporation, amounting to one third, during the five-year aging period.

Excellently General Andrews is worrying about being too slow to keep up with the doctors and the druggists.

## Carried His Own Head

Denik, patron saint of France, after having been beheaded in a Roman Imperial persecution, in 272, is said to have picked up his head and carried it for a considerable distance before collapsing.

## ANDOVER

Mr. E. L. Knapp of Bangor was in town the first of the week buying fur and deer skins.

Ralph Marston and party who spent two weeks at their camp on C Pond, returned to their homes in Boston, Thursday.

Mr. and Mrs. Walter Akers of Bangor spent Sunday with their parents, Mr. and Mrs. Lucien Akers.

The King's Daughters will meet Thursday, Dec. 10th, with Mrs. Lettie Tucker.

Mrs. Paul Head of West Bethel was a guest of her parents, Mr. and Mrs. J. C. Akers, last week.

The Farm Bureau will hold an all day meeting in the hall Thursday, Dec. 2.

When Christmas Suggestions and Bazaar will be the subject.

Mr. and Mrs. Guy Akers and children motored to Weston, Mass., Wednesday to spend Thanksgiving with his sister, Mrs. Erlon Merrill, and husband.

Miss Florence Hodgkins, teacher in the Grammar School, is spending the Thanksgiving recess at her home in Standish.

Miss Dorothy Young, teacher at So. Andover, is at her home in Backfield, and Miss Helen Collins of North Andover is at her home in Randolph.

The schools in town closed Tuesday for the remainder of the week.

Mr. and Mrs. C. A. Rand and son, Winslow, of Hebron and Miss Meriam Rand spent Thanksgiving Day with Mrs. Eva Tukey in Portland.

Miss Marie Elliott of Gorham Normal School is spending the holiday in town.

## SUNLIGHT AND HEALTH

By the Children's Bureau, U. S. Department of Labor  
"Bottled Sunshine"

For over a century and a half cod-liver oil has been known to exert a favorable influence in rickets. Proof that cod-liver oil had a specific curative action in rickets, apparently similar to that of sunlight, was obtained in this country in 1921 and the cure demonstrated by x-ray photographs of the bones of rachitic children. As a result of even more recent experiments it is probable that the action of sunlight and cod-liver oil in the cure of rickets is the same and that the oil from the liver of the cod fish has acquired its antirachitic power from the sunlight passing through the water to the fish or to the plants eaten by the fish. It has been definitely shown that vegetable oils, milk, green vegetables and grains may also acquire this antirachitic power if

irradiated with ultra-violet radiation. When cod-liver oil is ingested by the infant the antirachitic power which it has stored up is liberated, to regulate metabolism and cure or prevent rickets. Thus cod-liver may truly be called "bottled sunshine."

The Children's Bureau has conducted a rickets demonstration in New Haven for three years. Every mother coming to our clinic is shown how to give her baby cod liver oil. The following routine is followed. Babies seen before the end of the first month of life are given one-half teaspoonful of pure cod liver oil twice a day. During the second month the dose is increased to 1 teaspoonful twice a day. Gradually this dose is again increased so that it amounts to 1 1/2 teaspoonfuls twice a

day or even 1 dessertspoonful twice a day at the end of the third or fourth month. It has been found that this amount of cod-liver oil is well tolerated by babies and that it can be successfully given in summer as well as in winter. During the hot summer months, the oil is best given in the early morning and at night. The bottle of oil should be kept cool.

When thinking of magazine and newspaper subscriptions remember that I can meet any price that you can get from any publisher, agency or traveling agent, and give satisfaction promptly in any trouble that may arise in the course of any subscription, changes of address etc. Do not fail to get my prices before renewing your subscriptions.
